**Web/Media Designer/Developer...**

The Learning Technology Center (LTC) of Peabody College at Vanderbilt University employed me from 1995 to 2003 when it closed down. In that time I contributed in some fashion to most of the projects generated by the LTC. In January 2001 I was promoted and joined the LTC's newly created Media & Technology Design Team. As a Web Architect with skills in web & multimedia development, I believe that I can contribute a valuable service to your business by designing & building web pages, developing graphics, aiding in presentation preparation, the recording, editing, compressing, & preparing of audio & video elements, print publications, and tech support for computers. I would love the opportunity to contribute to your goals. Thank you for considering me, and if you have any questions, I would be more than happy to answer them for you.
